

YOUR SOLAR SOLUTION

The Carbon X Solutions (CXS) Difference

Before Carbon X Solutions (CXS), the green credit market was essentially only available to large companies. Through our proprietary methodology and aggregation model, we are now offering small companies and homeowners the ability to get paid for owning solar.

The Demand for Carbon X Green Credits:

Companies and governments around the world have pledged to go carbon neutral. They physically can't be carbon neutral. However they can buy green credits like Carbon X Green Credits to offset their carbon footprint. Green credits are produced when a project such as solar reduces greenhouse gas emissions a company would have made.

CXS Green Credit Market:

The Green credit market is expected to grow five times by 2030 according to Reuters. Bloomberg estimates it carbon markets could grow by 3000% by 2029.

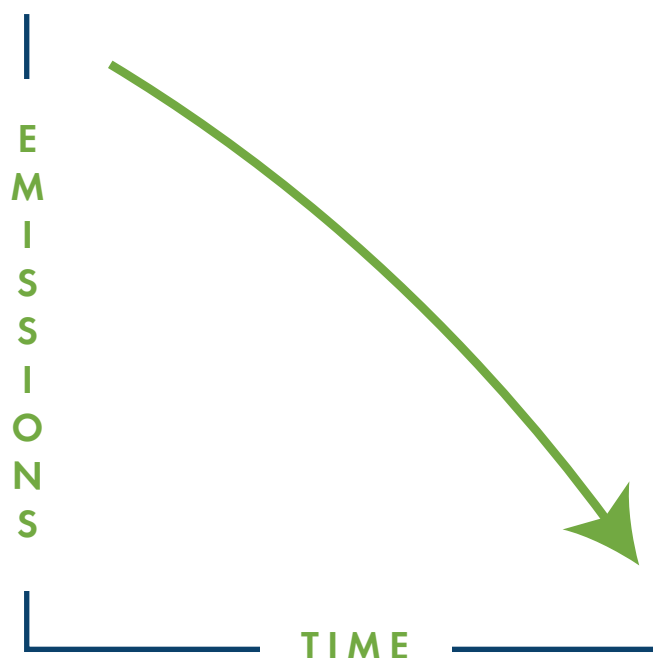

Risk:

If you already have an inverter with compatible internet connectivity that allows us access to validate the amount of electricity you produce, there is zero cost to the producer.

Company Goals

COMPANIES THAT PLEDGE TO BE CARBON NEUTRAL START OFF WITH HIGH EMISSIONS BUT OVER TIME THE GOAL IS TO HIT ZERO, TO BE TOTALLY GREEN.

Next Steps:

- 1 Contact your local sales representative.
- 2 Sign our contract.
- 3 Allow access to your internet-connected inverter.
- 4 Get Paid

HOW CXS GREEN CREDITS WORK
